

My HOPE story

I was diagnosed with Retna Blastoma a rare eye cancer and due to that I lost my left eye when I was 1 years old. And A guy from my reserve (Whitecap Dakota First Nation) did a Sun Dance and a week later I was healed, but I still go regularly/yearly checkups but other than that I'm healthy and happy to be at camp with my sister (even though it's her last year) but I'll be fine on my own and yah.
